

LITHIUM COMPLEX GREASE HP2 BLUE

PRODUCT DESCRIPTION

ARDINA Lithium Complex Grease HP2 Blue is a specially developed multi-purpose lithium complex grease for the lubrication of all plain and anti-friction bearings for use in automotive and industrial applications. The lithium complex grease shows remarkable performance and provides continued lubrication intervals over a wide operating temperature range.

BENEFITS

- ✓ Highly versatile
- ✓ Good oxidation stability provides lasting lubrication at high temperatures >150°C
- ✓ Excellent extreme pressure (resistant to weld loads >450 kg) and anti-wear performance
- ✓ Exceptional mechanical stability extends relubrication intervals
- ✓ Good water resistance protects components from corrosion operating in wet conditions
- ✓ No adverse effect on sealings

USAGE

Follow the recommendations from the equipment and / or bearing manufacturer. Check compatibility with the grease applied previously and if necessary purge bearings or clean the application area prior to application.

DOSAGE

Do not over-lubricate and apply the quantity of grease recommended by the bearing or equipment manufacturer.

TECHNICAL SPECIFICATIONS

Thickener	Lithium soap
Colour	Blue
Base Oil	Blend mineral oils
NLGI Class	2
Worked penetr.	265 to 295
Dropping point	250°C
Operating Temp	-20°C to +150°C
Water washout @ 39°C	3%
Four Ball Weld Load	450 kg
Roll Stability	+30 max

PACKAGING DETAILS

Art. No.	68773
Content	400 gr
Pallet	1176 pcs
